

Prevention of ice cream syrup leakages from pipeline

Company Code: UZ-FG-002

Location: Fergana, Uzbekistan

Sector: Milk Ice cream manufacturing

Before

- Milk ice cream syrup was leaking from pipeline
- This led to waste of processed milk syrup which was ready for making ice cream
- This was also creating spillage on the floor

After

- Leaks in the pipeline were repaired
- This led to immediate recovery of milk syrup for ice cream production and reduced wastages of processed raw material
- Improved housekeeping due to reduced spillages

Benefits & Payback

Cost: Nil

Payback: Immediate

Annual Savings: UZS 20,592,000

Milk syrup Saving: 4100 litres per annum
